MINNESOTA MEDICINE Covers

In order to select the best cover pictures for MINNESOTA MEDICINE the cover editor requests that all amateur photographers search slide collections and submit more pictures. The appreciation of beauty is always quite subjective, whereas the selector might find a different picture desirable for the cover. Such factors as the background, the amount of lighting, and the presence of extraneous background images on the slide may make a cover selection less desirable. It is suggested that several of your better pictures be submitted for consideration in the hopes that one might be chosen. Currently the cover editor is in need of photographs starting with next November's edition which would include late fall and winter scenes. It is requested that vertically positioned slides be submitted at this time in order to try a changed cover format.
